Marina Meier is an Information governance professional at the Naval Nuclear Laboratory in East Idaho. Marina began her professional career in records management in 1994 at the Yucca Mountain Project (YMP) in Las Vegas Nevada. She quickly developed a love for information technologies, data management and analysis. She has worked on many projects, including the development of a records information system, and designing the Nevada rail system map for the YMP. In 2010 she moved to east Idaho with her two daughters and husband, where she worked in education as a Research Analyst for the College of Eastern Idaho (formerly EITC) while continuing her education. Marina later received a Bachelor's Degree in GIS, and an Associate Degree in Information Technologies. She really enjoys applying her mad skills in her current position as a Records Officer for the Naval Nuclear Laboratory. Marina loves everything about Idaho, especially the cooler weather and various outdoor year round activities. She also enjoys helping people in her community, and volunteers to help seniors with their canines, and is involved with supporting local elementary school food banks. When she is not working or volunteering, she is enjoying time with her family, gardening, and playing with her German shepherds.

Carrie's Records & Information Management experience began in 1997 while employed as Deputy City Clerk in Alaska, which also included serving as Records Manager for the Municipality. She is employed by the JR Simplot Company as Records & Information Management Supervisor and has been with the company for 17 years. After arriving in Idaho in 2005, Carrie had the pleasure of serving the Boise Valley Chapter in all Board positions and a couple of committees. After a hiatus to complete a B.S. in Sociology, Business minor, she is happy to re-engage with the local chapter. She is currently working on her CRA designation through ICRM. In her spare time, she enjoys cheering for grandkids in their sporting events, camping, fishing, archery hunting, genealogical research, travel, helping others in need, and most of all spending time with family.
